INTRODUCTION TO THE MAJOR

The **Rhetoric major** trains students in the history of rhetorical theory and practice, grounded in argumentation and in the analysis of the symbolic and institutional dimensions of discourse. Students gain a pragmatic understanding of the elements of rhetorical analysis, with special attention to logic, style, tropes, figures, and images, and receive a thorough grounding in the historical development of these elements in rhetorical theory.

This combination allows students to have a disciplined grasp of the contemporary character of rhetoric and language. Within the framework of understanding classical and contemporary theories and practice of interpretation, students can explore the role of persuasion in pragmatic and aesthetic contexts.
